KRISHNA PRASAD.A

front-end developer

About Me

Passionate and skilled front-end developer proficient in React, HTML, CSS, and JavaScript. Committed to creating visually appealing and user-friendly web applications. Quick learner with a focus on writing clean and maintainable code. Eager to contribute creativity and technical expertise to innovative projects. Actively seeking opportunities to kickstart my career in front-end development and make a positive impact in the industry.

PROJECTS

OLX clone

The OLX Clone project is a web application built using React, Firebase, JSX, and CSS, with an additional "Sell" option to allow users to list their products for sale. Inspired by the popular online classifieds platform, OLX, this project aimed to create a user-friendly and dynamic platform for buying and selling various products.
